4. Archive.org:

Internet Archive is a non-profit library of millions of free books, movies, software, music, websites, and more.

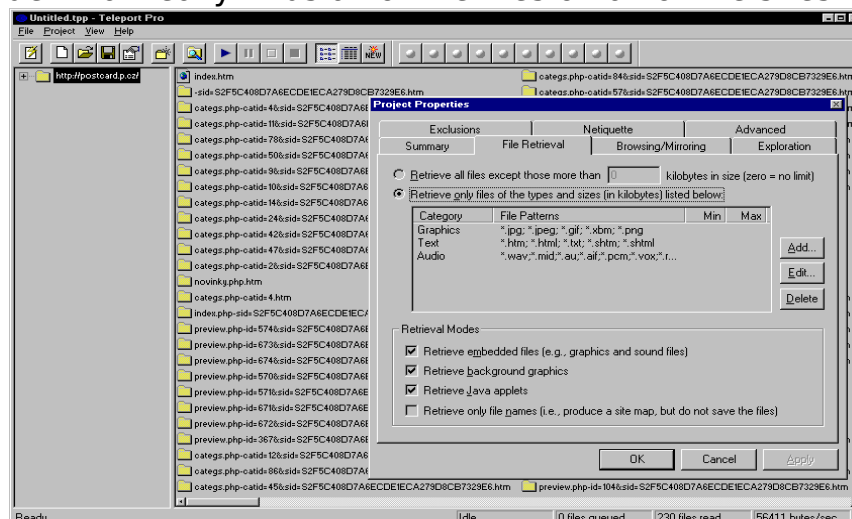

5. GSA Email Spider:

Collect and extract emails, phone and fax numbers from the websites around the world using the keywords you enter for! The websites will be analysed by this application using the keyword you entered as search string.

6. Teleport :

Teleport Pro is an all-purpose high-speed tool for getting data from the Internet. Launch up to ten simultaneous retrieval threads, access password-protected sites, filter files by size and type, search for keywords, and much more. The most fully-featured and robust webspider available, Teleport Pro handles today's more complex websites flawlessly. Capable of reading HTML5, CSS3, and DHTML, Teleport is the only webspider that really finds all of the files on all of the sites.

7. Surf Offline:

SurfOffline is a website download software. The software allows you to download entire websites and download web pages to your local hard drive. After the website has been downloaded, you can use SurfOffline as an offline browser and view downloaded web pages in it. In case you prefer viewing downloaded webpages in another browser, use the Export Wizard.
