Ethical Hacking and Cyber Laws - Assignment 5

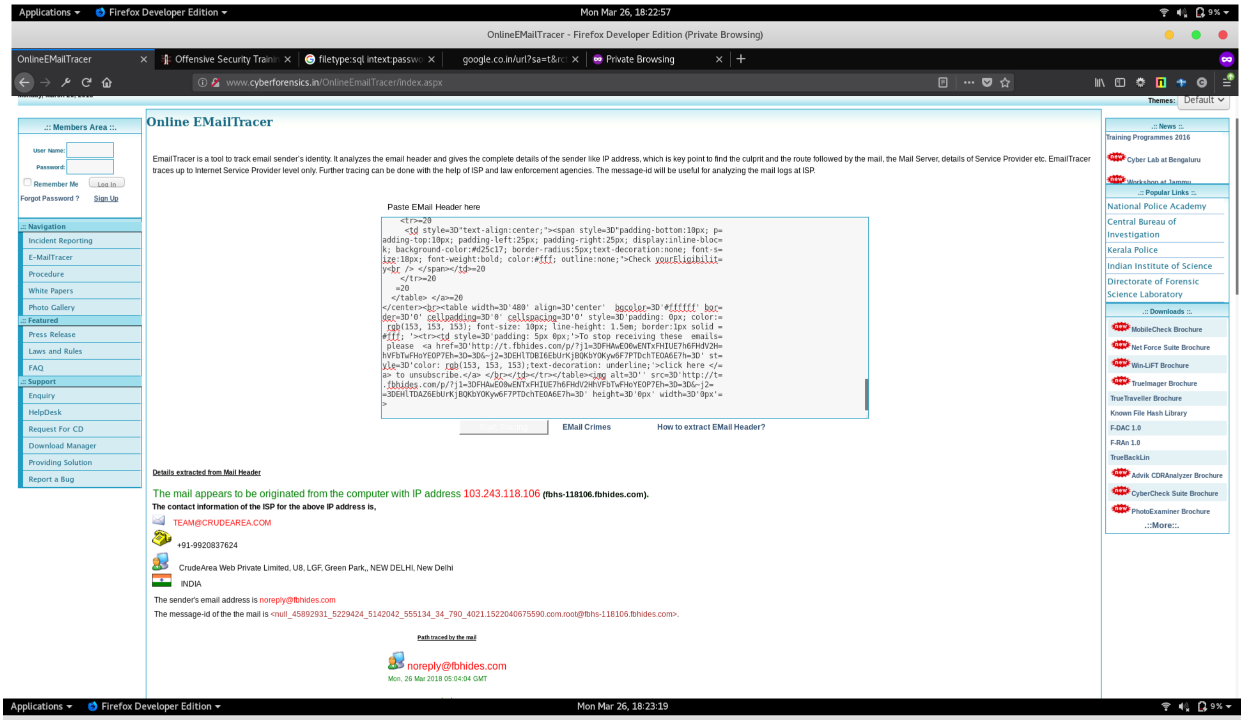
B. Pavan Sai
17-08-13

1. Exploring Email Tracer

Email Tracer is an online as well as offline tool provided by Resource Center for Cyber Forencics, India [CDAC]

It is used to check if a mail is authentic or malicious and can trace to the source of mail.

User has to input a particular email header to check its authenticity.



Online EMailTracer

EmailTracer is a tool to track email sender's identity. It analyzes the email header and gives the complete details of the sender like IP address, which is key point to find the culprit and the route followed by the mail, the Mail Server, details of Service Provider etc. EmailTracer traces up to Internet Service Provider level only. Further tracing can be done with the help of ISP and law enforcement agencies. The message-id will be useful for analyzing the mail logs at ISP.

Paste EMail Header here

```
    <tr>=20
     <td style=3D"text-align:center;"><span style=3D"padding-bottom:10px; p=
adding-top:10px; padding-left:25px; padding-right:25px; display:inline-bloc=
k; background-color:#d25c17; border-radius:5px;text-decoration:none; font-s=
ize:18px; font-weight:bold; color:#fff; outline:none;">Check yourEligibilit=
y<br /> </span></td>=20
    </tr>=20
   =20
  </table> </a>=20
</center><br><table width=3D'480' align=3D'center'  bgcolor=3D'#ffffff' bor=
der=3D'0' cellpadding=3D'0' cellspacing=3D'0' style=3D'padding: 0px; color:=
 rgb(153, 153, 153); font-size: 10px; line-height: 1.5em; border:1px solid =

2. Netcraft

Netcraft is a simple but excellent tool which generally is used for getting risk information of a paricular website.. Though the tool gives much more information about that website.

Netcraft is available as both website and extension for web browsers like Google Chrome and Firefox.

⊟ Background

Site title	Offensive Security Training and Professional Services	**Date first seen**	December 2006
Site rank	1305	**Primary language**	English
Description	Information Security Training, Ethical Hacking Certifications, Virtual Labs and Penetration Testing Services from Offensive Security, the creators of Kali Linux		
Keywords	information security training, infosec certifications, ethical hacking courses, online security training, penetration testing services, kali linux training, pentest training, Offensive Security Training, Professional Services		
Netcraft Risk Rating [FAQ]	0/10		

⊟ Network

Site	https://www.offensive-security.com	**Netblock Owner**	Sucuri
Domain	offensive-security.com	**Nameserver**	ns2.no-ip.com
IP address	192.124.249.5	**DNS admin**	hostmaster@no-ip.com
IPv6 address	*Not Present*	**Reverse DNS**	cloudproxy10005.sucuri.net
Domain registrar	no-ip.com	**Nameserver organisation**	whois.no-ip.com
Organisation	ATTN: offensive-security.com, c/o No-IP.com Registration Privacy, P.O. Box 19083, Reno, 89511, United States	**Hosting company**	Sucuri
Top Level Domain	Commercial entities (.com)	**DNS Security Extensions**	*unknown*
Hosting country	US		

⊟ SSL/TLS

SSLv3/POODLE	This site does not support the SSL version 3 protocol. More information about SSL version 3 and the POODLE vulnerability.
Heartbleed	The site offered the Heartbeat TLS extension prior to the Heartbleed disclosure, but is using a new certificate. This test does not exploit the Heartbleed vulnerability but uses information from conventional HTTPS requests. More information about Heartbleed detection.
Assurance	Domain validation

3. Shodan

Shodan is a search engine which is generally used for offensive purposes or forensics. It provides various facilities to explore almost all kinds of devices connected to internet. It provides these services basing on the Meta-data of the servers connected.
